

Our Pricing Models

At EGS, we offer two primary pricing models designed to provide flexibility and transparency:

- Fixed Price: Best for well-defined projects, where we handle all aspects of development and deliver a complete solution within the agreed timeline and budget.
- Time and Materials (T&M): Ideal for dynamic projects, offering flexibility and real-time monitoring of progress, resources, and costs.

While these serve as our foundational approaches, we understand that every project is unique, and we are fully equipped to customize our services to meet your needs. Reach out to us, and together we'll identify the model that aligns with your goals.
